What is this Product?

Type

The Interests are partnership interests in Crown Co-Investment Opportunities IV Feeder S.C.Sp. (the "Fund"). The Fund is organized as a special limited partnership (société en commandite spéciale) under Luxembourg law. The Fund is an alternative investment fund within the meaning of the Luxembourg law of 12 July 2013 on alternative investment fund managers ("AIFM Law"). CCO VI GP S.à r.l. acts as the Fund's managing general partner (the "General Partner"). The General Partner has appointed LGT Capital Partners (Ireland) Limited as the Fund's external alternative investment fund manager.

The Fund is a feeder fund which will invest substantially all of its assets in its master fund, Crown Co-Investment Opportunities IV Master S.C.Sp. (the "Master Fund"), a Luxembourg-domiciled special limited partnership, and hence the performance of the Fund will depend on the performance of the Master Fund as further outlined in the section "Objectives" below.

Term

The term of the Fund shall continue until the dissolution of the Master Fund or unless the Fund is sooner dissolved in accordance with the Fund's Articles of Association or by operation of Companies Law or other mandatory law (droit applicable). The term of the Master Fund shall continue until the tenth (10th) anniversary of the Master Fund's initial closing date, unless the term of the Master Fund is extended or dissolved sooner as provided for in the Master Fund's limited partnership agreement ("Master Fund Partnership Agreement").

Objectives

The Fund is a feeder fund which will invest substantially all of its assets in the Master Fund.

The objective of the Master Fund is to provide its Limited Partners with attractive long-term capital appreciation from a globally diversified portfolio of Private Equity Co-Investments. The Partnership shall predominantly invest in Private Equity Co-Investments, which are located or have substantial business operations in Europe or North America.

The product is of a long-term nature. The performance of the Fund depends on the returns achieved in the Master Fund and its underlying investments ("Underlying Investments"). A positive performance of the Underlying Investments will lead to a positive performance of the Fund. Conversely, a negative performance of the Underlying Investments will result in a negative performance of the Fund.

The general partner of the Master Fund, at its sole discretion, may borrow money to bridge call notices and/or to employ leverage on behalf of the Master Fund (directly and/or at the level of the Portfolio Companies) or may otherwise incur indebtedness on behalf and in the name of the Master Fund; provided, however, that, on or after the final closing date of the Master Fund, the total amount of any borrowing to bridge call notices, as of any given date, shall not exceed 20% of the aggregate subscriptions of all partners unless to the extent necessary to mitigate the effects caused by defaulting partners. The Fund and the Master Fund are actively managed and do not make their investments in reference to a benchmark.

The Fund and the Master Fund intend to promote environmental and social characteristics in line with article 8 of the EU Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector ("SFDR").

BNP Paribas has been appointed as the depositary of the Fund (the "Depositary"). Further information, such as copies of the Offering Memorandum, the Articles of Association and annual reports (if available) can be obtained from the PRIIP Manufacturer, in English and free of charge. The Master Fund Offering Memorandum, the Master Fund Partnership Agreement and the annual reports of the Master Fund (if available) are available at the registered office of the Master Fund in English and free of charge. Additional practical information, such as the most recent prices of the Interests, can be obtained from the PRIIP Manufacturer. The Fund is a closed-ended investment, meaning you are not able to request the redemption of part or all of your Interests. The Fund shall determine, at its own discretion, when and whether dividends will be paid to investors.

Intended retail investor

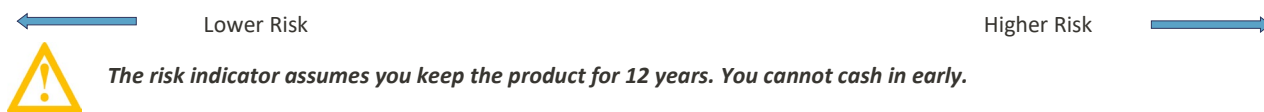

The Fund is suitable for retail investors who (amongst others) (i) have sufficient experience and theoretical knowledge to assess the risks of investing in the private equity market; (ii) are seeking exposure to a closed-ended investment and (iii) have a long-term investment horizon; (iv) can bear the loss of their entire investment. The need of the retail investor to be able to bear the loss of their entire investment is due to several risks, including market risk, which can significantly impact your return on investment. These risks are further described in the section "What are the risks and what could I get in return?" below. Only investors committing an amount less than USD 30 million but equal to or more than USD 5 million are eligible to subscribe for the Interests described in the Key Information Document, and such subscriptions must

comply with the terms set out in the Offering Memorandum.

What are the risks and what could I get in return?

Risk Indicator

1	2	3	4	5	6	7
----------	----------	----------	----------	----------	----------	----------

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as a 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the Fund’s capacity to pay you. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavorable, moderate, and favorable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 17 years. Markets could develop very differently in the future.

Recommended holding period: 12 Years	
Example Investment: 10,000 USD	
Scenarios	If you exit after 12 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.
Stress	What you might get back after costs 1,770 USD
	Average return ¹ each year -21.93 %
Unfavourable²	What you might get back after costs 10,360 USD
	Average return ¹ each year 0.50 %
Moderate³	What you might get back after costs 23,280 USD
	Average return ¹ each year 12.82 %
Favourable⁴	What you might get back after costs 28,650 USD
	Average return ¹ each year 16.22 %

² The seven-year scenario is based on a shorter period and occurred for an investment in the suitable benchmark between Oct 2024 and Oct 2025.

³ The seven-year scenario occurred for an investment in the suitable benchmark between May 2017 and May 2024.

⁴ The seven-year scenario occurred for an investment in the suitable benchmark between Oct 2014 and Oct 2021.

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor / and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

What happens if the LGT Capital Partners (Ireland) Limited is unable to pay out?

The assets of the Fund and of the PRIIP Manufacturer are segregated, so the default of the PRIIP Manufacturer should not have a financial impact on investors. With respect to the Depositary, there is a potential default risk if the assets of the Fund held with the Depositary, or by a sub-depositary to whom the safekeeping of assets has been delegated, are lost. However, such default risk is limited due to the rules set out in article 19 of the AIFM Law and in the Commission Delegated Regulation (EU) 231/2013 which require a segregation of assets between those of the Depositary and the Fund. The Depositary is liable to the Fund or to the investors of the Fund for the loss by the Depositary or one of its delegates of a financial instrument held in custody unless the Depositary is able to prove that the loss has arisen as a result of an external event beyond its reasonable control. For all other losses, the Depositary is liable in case of its negligent or intentional failure to properly fulfil its obligations pursuant to the AIFM Law. Losses are not covered by any investor compensation or guarantee scheme.

¹ The figures shown above assume a commitment of 10,000 USD. The amount will be called over time and might not be called completely. The average returns above are calculated on the basis of the committed amount and capital invested over 7 years. The scenarios presented are based on 7-year rolling windows to align with the average hold time of underlying investments.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the recommended holding period we have assumed the product performs as shown in the moderate scenario.
- 10,000 USD is invested².

If you cash in after 12 years	
Total Costs	3,962 USD
Annual cost impact *	2.6 %

* This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 15.45% before costs and 12.82% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you redeem after the recommended holding period
